

JAY MARK V. AGSOY

Davao City, Davao del Sur | P: +63 955 100 4950 | jaymark23x@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) |

Full-stack developer with hands-on experience in web systems development, AI orchestration, and systems-level programming through academic and personal projects. Skilled in Laravel, Vue, Python, Java, and MySQL, with a focus on building maintainable systems that solve real problems. I prioritize practical solutions over trends and choose tools based on what the job demands.

EDUCATION

University of Mindanao

Bachelor of Science in Computer Science

Specialized in Machine Learning & Cyber-Security

Relevant Coursework: Data Analysis, Software Engineering; Cyber-Security; Algorithms; Machine Learning

Matina, Davao City, Davao Del Sur

2023 - Present

Carlos P. Garcia Senior High School

TVL - Information, Communication and Technology

Relevant Coursework: Computer System Servicing, Networking, OS Installation

J. Luna St, Davao City, Davao Del Sur

2021 - 2023

SKILLS

- **Language:** Java, Python, JavaScript, CSS, HTML5, Kotlin, SQL, C/C++, PHP
- **Framework:** Vue, Laravel, TailwindCSS, Vite, REST APIs
- **Database:** MySQL, Firebase
- **Dev Tools:** Git, GitHub, VS Code, IntelliJ IDEA
- **Design:** Figma, UI/UX Wireframing
- **Soft Skills:** Adaptability, Critical Thinking, Complex Problem Solving, Collaboration

PROJECTS

Rei Project - AI Assistant - LLM Orchestration | TTS | Live2D

Full-Stack Developer

- Architected a modular, zero-cost AI assistant with Live2D character integration, custom-tuned TTS, and intelligent LLM routing.
- Built an LLM orchestrator with provider-agnostic routing, latency-weighted load balancing, circuit breaker pattern, persistent memory, and automatic cooldown management.
- Engineered a custom TTS voice using Kokoro with pitch, speed, and EQ tuning to match character personality.
- Integrated browser-based Live2D character with mouse-follow, facial expressions, and lip-sync animation synced to TTS output.
- Applied 3-phase development: rapid prototype → stabilization → feature expansion.

Coolant - HVAC/R Service Management System - PHP | JS | CSS | MySQL

Full-Stack Developer

- Architected full-stack application using vanilla PHP, MySQL, and Shoelace Web Components with a lightweight MVC pattern and AJAX-driven CRUD.
- Built a complete business workflow: appointment scheduling, a 7-step guided wizard for quotations/service reports, technician assignment, and print-ready document generation.
- Designed an intuitive dashboard with weekly calendar views, appointment tracking, pending collections, and employee availability progress rings.
- Implemented role-based employee management with automated pay processing.

ML - Intrusion Detection System - Streamlit | Scikit-learn | CatBoost | Python

ML Integration Engineer

- Served as the core integrator for a collaborative IDS research project, translating backend machine learning models into a functional application to facilitate team-wide testing and evaluation.
- Integrated trained CatBoost and Scikit-learn pipelines into a centralized Streamlit environment to enable automated, live threat inference on network traffic data.

- Engineered the project's testing infrastructure, including a Simulation Lab and Manual Prediction panel—allowing teammates to inject custom parameters, attack scenarios, and evaluate model sensitivity.

SEMINARS & TRAINING

Industry Integrations Sept 2025

- Software Quality Assurance in Modern Practice

Technical Training June 2026

- Node.js and GitHub Training

Internship Seminars June 2026

- Office Etiquette, Work Ethics, Gender & Sexual Harassment Awareness, Mental Hygiene
